

Fund Cancer Research

- Millions of cancer patients and survivors are alive today thanks to federal funding of cancer research.
- Every major cancer breakthrough in the past 50 years can be traced back to federally funded research.
- Despite progress, there could be about 160,000 new cancer cases and nearly 50,000 cancer deaths among LGBTQ+ people in 2024.
- To save even more lives, we need continued funding for cancer research and prevention.

Ask Congress to make cancer research and prevention funding a priority and help end cancer as we know it, for everyone!
